RAYMOND

A live town in a rich agricultural and stock-raising district. A good place to make your home.

Vol. 29

FRIDAY, JUNE 13, 1930

No 12

## News Notes

Monday was the warmest day of the summer so far, the mercury rising to 82 above at the A. C.

Lee Brewerton and Lowell Court were Magrath visitors on Monday this week.

O. J. Rolfsen purchased a new Ford Town Sedan from King Motors on Friday this week.

Dean Rolfsen and Welburn VanOrma arrived home from Normal School on Saturday afternoon.

Brewerton Bros. Magrath Theatre will likely open to the public early this coming week.

Mr. and Mrs. H. R. Bryner of Magrath, spent Sunday in Raymond with relatives.

Mr. McRae of the Mid West Paper Sales, Calgary, was a Raymond visitor on Thursday last.

Crops are making rapid growth these hot days and so far show no ill effects from the heat.

A few drops of rain borne on the wings of a high wind looked threatening for a while Saturday evening but passed over without any downpour.

Stock raisers and beef feeders were in Convention in Lethbridge on Friday talking over questions of feeding marketing, beef types, etc.

Roy Wolf, Percy Poulsen, R. W. Low and E. Hudson of Magrath spent the week-end at Waterton Park and enjoyed some fishing. They report a very enjoyable time.

The Elevated Grader working north of Welling is throwing up a good grade and when completed will make a splendid road.

If your name is not on the voters list and you want a vote you will need to get busy at once.

Southern and North Alberta have far the best crop prospects of the entire province according to press reports. Calgary to Edmonton has been hard hit by high winds and crops need rain. The Peace River country is looking good.

The second flowing well in the Red Coulee field was reported Saturday morning when the Hannah-Porter well blew in and became a gusher before it was capped. It soon filled a 250 barrel tank and at 10 a.m. Monday morning another 250 barrel tank was nearly full.

## FOURTH FORTNIGHTLY CROP REPORT

(Issued by Department of Agriculture, Govt. of Alberta June 7th)

Showers falling over a large part of the province early in the past week followed by higher temperatures and an absence of winds have created a more favorable crop outlook than existed ten days ago.

During the last week in May continued high winds caused soil drifting resulting in widespread injury to growing crops in the central part of the province and in limited areas re-seeding was necessary. It is impossible at present to accurately estimate the damage due to soil drifting. The degree in which severely blown fields will recover will depend upon the weather conditions of the next ten days. There is considerable injury to crops due to wireworms and cutworms and it may be stated that injury due to soil drifting and insect pests is slightly above the average.

Reports from the areas lying south of Calgary and north of Edmonton continue to be most favorable. Moisture in these areas has been sufficient for present needs and they have not suffered from soil drifting as in other parts of the province.

A number of our correspondents report pasture fair and livestock in good condition. The hay crop however, outside of the irrigated areas is likely to be below average. On the irrigated lands alfalfa is making excellent progress.

# Magrath Wins 8 to 7

Raymond lost its second League Baseball game on Friday night last week to Magrath by a 7-8 score which saw-sawed all through the game. It was an interesting game to watch as at no time was either team safe.

The visitors got a man around in the first and Raymond tied things up in the second. In the third Magrath got two and the home team took two in the fourth and made it 3-3, and so it went. Magrath got 4 in the fifth and 1 in the seventh, and Raymond got 3 in the fifth and 1 in the seventh and stopped.

J. Tuftland started pitching for the visitors and was going good until the fifth when Joe McLean hit a homer nearly out of the lot and Joe quit. Geo. Turner then went in and finished the game and turned in a good game. Allred on the mound for Raymond went the full distance and did wonderful work, 18 batters whipping the ozone. Tuftland got 7 strikeouts in 4½ frames and Turner got 10 in the balance of the nine innings.

The score by innings was as follows:  
Magrath 102 040 100—8  
Raymond 010 230 100—7

R. H. E.  
Magrath 8 7 4  
Raymond 7 7 4

The lineup was as follows:—

Magrath—Mercer, 2c; J. Tuftland, p; Robinson, 3b and ss; Davis, cf; Jacobs, lf; J. L. Gibb, rf; E. Blumel, c; Matkin, 1st; G. Card, rf; G. Turner, lf and p; Karren, ss and 3b; Shaffer, 1b.  
Raymond—Humphreys, lf; Walker, cf; Nalder, ss; McLean, 3b; Kirkham, cf; Hicken, c; Robbins, rf; Brewerton, 2nd; Fairbanks, 1b; Allred, p.

R. S. O'gill for Raymond and D. Dow for Magrath did the umpiring.

## Spring Coulee Game Ends in Deadlock

Spring Coulee and Raymond crossed bats here Wednesday evening in a league game which was 6-6 at the end of nine hard fought innings, and then the game was called because of darkness. That it was interesting is indicated by the score.

The visitors played good ball, making few errors and chalking up some outstanding plays. Raymond played fast, clean ball, but some errors at strategic times came nearly losing the game for us.

Vern Henry was the king of Swat, when he got five safeties in as many times at bat and brought in two of the six runs scored. Robbins got a beautiful three-bagger down the first base line and Humphreys hit one and

## News Notes

R. W. Risinger, Liberal candidate opposing M. J. Connor in the Warner Constituency was a Raymond visitor on Tuesday this week.

Mr. and Mrs. Reg. Cooper, Mrs. M. R. Wolf, and Mrs. S. I. May, went to Cardston Wednesday. Reg. returned in the evening with K. Allred who pitched the ball game for Raymond against Spring Coulee.

It is reported that air mail service between Edmonton Lethbridge and Great Falls to link up with the U.S. Mails will be started early in August.

The Public Meeting to be addressed by M. J. Connor, M.L.A., was originally scheduled for tonight (Friday), but the Liberal Meeting of R. W. Risinger and J. W. Macdonald, K. C., was also advertised for that date, so Mr. Connor's meeting was set forward until Monday night June 16, at 8 p.m. in the 2nd Ward Chnl.

## BASEBALL SCHEDULE

June 18  
Magrath at New Dayton  
Raymond at Spring Coulee

June 25  
Spring Coulee at New Dayton  
Raymond at Magrath

July 1st.  
Magrath at Spring Coulee  
New Dayton at Raymond

Hicken a pair of two base hits. Ernie and Ken Long for Spring Coulee each got two baggers.

Gilchrist for the Coulee and Kin Allred for Raymond each got eight strikeouts, the cold afternoon making spectacular ball out of the question.

## SCORE BY INNINGS

R H E  
Spring Coulee 001 031 010 6 7 3  
Raymond 00 230 001 6 10 6

The lineup was as follows:—

Spring Coulee—E. Lang, ss; Munroe, cf; W. Rice, c; K. Long, 2b; Risveld, 1b; R. Long, 3b; E. Rice, cf; Gilchrist, p; Chapman, rf.  
Raymond—Henry, 3b and lf; McLean, 3b; Nalder, ss; Humphreys, cf; Robbins, 2b; Hicken, c; Kirkham, rf; Allred, p; Fairbanks, 1b; Tolstrup, lf; Brewerton, 2b.

Soloa Low for Raymond and Geo. Irwin for Spring Coulee handled the indicators.

## STEEL AT 26 MILES AN HOUR

At Sharon, Pa., a mill has been put into operation that rolls steel strips at the rate of twenty-six miles an hour. Thus is inaugurated in the United States the high speed production of sheets. Several other mills, now under construction, have been licensed under the basic patent and plan to begin operation in the near future. The plant of the Sharon Steel Hoop Company is entirely electrified. The steel is said to go through the rolls so fast that one end of the strips is in the shipping room before the other end leaves the furnaces.

This is one of the many important developments which are now being made in the industry and which promises to effect a great change in the manufacture of steel and the use of steel products. For instance a method has been devised for the production direct from the ore—mechanical puddling. Larger furnaces are being constructed and improvements made in the control of heat. While all these advances are seemingly aimed to produce more of the article with the expenditure of less manual labor at the same time the industry is looking around for new markets and larger consumption of the output.

By use of the electric welder a steel plate floor has been designed and is now being introduced into office buildings, skyscrapers, bridges and other type of structures. The potential market is said to be tremendous. The electric welder has also reduced the cost of pipe making. But the industry's most active interest is being displayed in the manufacture of alloy steels.

More than 200 alloy steels have been patented since the Germans first introduced "rustless" steel. Some of these are being used in building construction. Some are being utilized by the manufacturers of automobiles. Others, impervious to acids, are utilized in the making of containers for the chemical industry. It is claimed that for the making of hulls of ships an alloy steel has been produced against which no barnacle will cling thereby rendering it unnecessary to dry-dock an ocean liner so frequently. Also, alloy steels capable of taking on a high polish have been offered to the manufacturers of tableware as a rival of silver plated and plated.

What these developments portend for the trade is a subject of open daily discussion in the industry. What they portend for employment and for the goods for which the new steels will be substituted is a matter of hopeful speculation for the public.—Christair Science Monitor.

## CLOSE ELECTION IS PREDICTED BY OTTAWA OBSERVERS

Ottawa, June 11, (Special to the Recorder)—The calm before the political has ended and the storm will be on with ever-increasing force for the next six weeks.

Two-and-a-half million Canadians, it is estimated, have access to radio receivers in their homes and probably a minimum of half a million listened in on the trans-Canada hook-ups which broadcast both Premier King and Mr. Bennett in their opening speeches of the campaign. The Bennett hook-up embraced twenty stations from Cape Breton to Vancouver and reports received in the capital show that he and the premier were heard in the most remote outposts of settlement.

Provincial broadcasting will be used throughout the campaign by both leaders while many candidates will make use of local stations to reach the public. There will be few national tie-ups for they compel the speaker to make completely different addresses for each occasion, a job which is not relished in the heat of the campaign in which a leader will travel probably 12,000 miles, meet thousands of people personally and be called on for from three to five speeches a day.

Good progress is reported with nominations by all parties, through co-operation between the government and independent members to eliminate three-cornered contests is not a simple matter as it was in 1925. This year some of the most severe criticism of the budget was voiced by the independents and there is no guarantee that they will support Mr. King in the event of a close result.

Some indication that Mr. King anticipates a result was embodied in his closing statement to parliament in which he stressed such a possibility. In fact all close observers at the capital appear to be agreed that the outcome will be close and the side it will swing to will be largely determined by conditions throughout Canada between now and polling day.

## News Notes

Mr. and Mrs. S. I. May were Magrath visitors Monday afternoon and evening.

F. E. Trautman, Publicity man for the C.P.R. at Winnipeg since 1912, passed away at Winnipeg on Saturday following an operation for blood poisoning. For years he has been sending out the C.P.R. Crop Reports that Western Canadians have read in the weeklies.

## THE MAN WHO PAYS

The will to pay is hereditary just as much as red hair or buck teeth. It is a common fallacy that a man pays his debts because he has money. That is not necessarily true. On the contrary the matter of paying has only a remote relation to money.

On the other hand it is your friend with abundance of money, who cannot be cajoled, threatened beaten or gassed into paying the most ordinary debt.

On the other hand the poor fellow without a visible dollar—you know him—who is Johnny on the invoice. Money has little to do with either case. It is the breed of the man.

The man who pays is the man who thinks in advance. He never flashes a roll; he does not drive a car and carry a mortgage at the same time; he does not hang up the butcher or the grocer for food that he cannot afford to eat; he never lights the fire without wondering where the coal gets off. He never throws the ball, nor pitches the bluff, nor gives notes nor writes cheques dated to-morrow, but when the hills come in he is there with the coin of the realm, God bless him.

Sometimes he feels sore at the rest of us. He does not see that he gets on any better than the fellow who skins as he goes. Still he goes on and on, and pays and pays, simply because it is in the breed.

And after all, the world does think a lot of his breed. The man who pays is the bulwark of Society. He is the balance wheel of civilization. He is the mainspring of commerce. Business blesses him, and he has honor among men for all time—Exchange

## Fascinating Links in Canada's History

Ottawa, June 12, (Special to the Recorder)—We have become so accustomed to a reliable and systematic mail service that even the slightest lapse is considered by most people almost a deadly insult. Very few of us stop to consider the numerous officials concerned or the tremendous detail necessary to this regular and efficient service. The post office, as a matter of history, is an interesting and intriguing study.

At the Dominion Archives there is a document which is very illuminating and instructive. It is a way bill of the courier carrying mail from Halifax to Quebec in the winter of 1811. It is addressed to "the several couriers on the route" and reads: "You are hereby ordered to use the utmost diligence in your respective routes to convey in safety and in the greatest possible speed the mail here with delivered to you. You are to show this way bill to the post masters on your route who are required to note the day of the month and the exact time of the day of your arrival at their offices respectively, together with the time when the mail is given by them to set in motion with the name of the courier into whose charge it is given. And the courier will himself set down the time of his arrival at and his departure from any of the places named in this bill at which there is a no postmaster. And wherever any unavoidable detention may have happened it must be noted in proper column and certified by next postmaster or by a magistrate or by some person residing where delay happened. And hereof you are not to fail. By order of the Deputy Postmaster General, John How Pitt."

In the space below columns are ruled off for the entering of the date, time, station, distance from the last station, name of the postmaster and the courier in charge and also a wide column for remarks, explanation for the delays along the road which seem to have occurred right from the start. The first entry was made at six p.m. on December 23rd, 1811, dated at Halifax where John Howe was postmaster and D. Hamilton was the courier. Crambe Hill was reached early the next morning and from there he proceeded to Windsor, Horton, Rye Plain, Aylesford, Smithfield, Wilmet, Annapolis, Digby, St. John, Long Reach, Crammercross Island, Fredrickton and Nidwili. Opposite all these places were entries telling of stormy weather, bad roads and minor accidents, and then, at the Indian village at the mouth of the Madawaska River, where the mail arrived at seven o'clock on the evening of December 25th, the courier, according to an explanation written in French, having awaited some considerable time for a guide who didn't show up, gave over the mail into the hands of two soldiers and a further note added two days later by one of them tells of engaging another guide. Whether or not the mail ever reached its destination, nearly two hundred miles further on, is unknown.

## News Notes

Cream prices in Alberta last week were Special grade, 29 per lb. to 17c for off grade.

It looked rainy Wednesday evening but the clouds blew over and Thursday it was clear and windy.

Excavating was done Wednesday for the base of the Soldiers Memorial. Concrete will be run next week.

The Raymond 1st Ward "M" Men journeyed to Magrath Tuesday evening to play the Magrath 1st Ward Team. The local boys won 10 to 11. Batteries were W. VanOrman and A. Stone for Raymond; G. Card and G. Turner for Magrath.

No Field and Track Meet will be sponsored this year by the Stake M. I. A. according to information given out this week. The M. I. A. are arranging a Fathers and Sons Outing however, details of which will be announced soon.

## NEWSPAPERMEN'S VISIT

Eighteen members of the Canadian Weekly Newspaper Association, representing every province from Nova Scotia to British Columbia, reached Montreal, March 7, by Canadian Pacific train from Ottawa. They held meetings at the Windsor Hotel and were later entertained at dinner there by Lord Atholstan, proprietor of the Montreal Star. The photograph shows the party on arrival at the Windsor street station, Montreal, and from left to right they are: A. W. Marsh, Echo, Amherstburg, Ont.; J. A. MacLaren, Examiner, Barrie, Ont.; H. S. Anslow, Hants Journal, Windsor, N.S.; H. B. Anslow, Graphic, Campbellton, N.B. (immediate past president); David

Williams, Bulletin, Collingwood, Ont.; F. A. J. Davis, Canadian, Carleton Place, Ont.; Hugh Savage, Cowichan Leader, Duncan, B.C. (president); D. C. Dunbar, Mercury, Estevan, Sask.; G. H. Mitchell, Post, Brainerd, Ont.; E. J. Bennett, Leader, Carman, Sask.; M. Macbeth, Sun, Milverton, Ont. (1st vice-president); George Lake, Advance, Timmins, Ont.; Lorne Bedy, Journal-Argus, St. Marys, Ont.; Charles Clark, Times, High River, Alta.; J. L. Cowie, News-Express, Carberry, Man.; C. E. McIntosh, M.P. News, North Battleford, Sask.; E. Roy Sayles, Mercury, Renfrew, Ont. (managing director and treasurer); George Legge, Leader-Mail, Granby, Que.

### HOW MUCH ARE THEY WORTH?

In view of the eternal and expensive struggle which Southern Alberta has with weeds, especially wild oats, farmers of the district who are raising beets, potatoes and other food crops should find some solace in the fact that each year as they rotate their crops, there will be a certain acreage that will finish the summer free from weeds, due to the hoeing and weeding of beets, etc.

We have been boasting for bigger and better acreages and yields in beets, and we are of the opinion that farmers will, eventually, find them one of the safest and most profitable crops they can raise.

Read the following article from a recent issue of the Lethbridge Herald under the heading "Make War On Weeds."

"Southern Alberta is facing one of its hardest fights this year in combating the weed menace.

Probably never before in Southern Alberta's history have wild oats given so much trouble on so many farms. And either they are going to be driven off the farm by the farmer, or they are going to drive the farmer off the farm.

This is a mighty serious problem just at this time when we are facing the possibility that we will have to take lower prices for our wheat. We can't grow paying wheat crops and weeds at the same time. If wheat prices are to be lowered we must cut cost of production, and that cost cannot be reduced if weeds are going to demand greater cultivation in order to combat them.

Summerfallowing is one way to get rid of the weeds in a wholesale way, and it is the best method yet in sight. Early spring cultivation to start the weeds, then plowing and continuous cultivation to keep the field black, will deal with most crops of wild oats and other weeds. Some farmers are finding, however, that plowless summerfallowing is giving better results because the weed seeds are not turned under to come to the surface at the next plowing, bringing the menace in that particular field to the fore again. Plowless summerfallowing gives good results in certain types of soil and each farmer will have to find out for himself if it is suited to his particular farm.

But in the end the final solution of wild oats and other weed menace will be in live stock seeding down the growing of row crop where there is some return to pay for the additional tillage required to fight the weeds. Rotation is the answer. Summerfallowing, after all, is a costly process, and the wise farmer will look about for some practical method to replace at least a portion of it."

In one year statistics figure the West lost the sum of \$3,125,000 in the value of its grain crop because of weeds. How many years can we afford to do this? With binder twine at its present price how much each year do our farmers pay to tie up the weeds they cut? How much do they pay for threshing and hauling these weeds to the elevator? and how much do they lose because of dockage?

Summerfallow helps in weed con-

trol, but this is costly, and particularly with wild oats results are uncertain because of our inability to control weather conditions. A perfectly clean piece of summerfallow this fall may be badly infested with wild oats when cultivated in the spring for seeding because the seed will lie in the soil for years, just waiting sunshine and moisture to come forth in strength and beauty (?).

Here is the opportunity for mixed farming. Pasture crops where the weeds are kept down and not allowed to seed. Hoed crops where the roots are cut out and destroyed, grain crops where every bushel through the machine is a bushel of grain instead of 10, 15 or 20 per cent. weeds.

As a district we want prosperity we want stability, we want quality and quantity in our crops. We have the soil, the sunshine and the moisture. Can we ask for more in the matter of opportunities. The factory will take our beets at a good price, put pulp and betaninasses within our reach at a moderate price for feed for livestock; and the raising of beets gives us an opportunity to make our land yield 8 or 10 tons of beets while not raising wheat instead of raising weeds and having to be worked two or three times as summerfallow.

We call the attention of the voters to the "Notice to Voters" inserted on the opposite page. Read it, and re-read it, until you have the details fixed in your mind. There is no need for any spoiled ballots if everyone will read the ad.

To know for whom you are going to vote is not sufficient; it is imperative that you know how to mark the ballot.

THE CUSTOMARY "X" WILL SPOIL YOUR VOTE. BE SURE

man's activity, to aid in the mobilization of his industry and to exploit the undeveloped regions of the world. Into that stream went cars for the masses and cars for the very rich, three-wheeled cars from Denmark, two-cylinder cars from Austria, trucks and buses from Nippon and millions of cars for all classes of buyers throughout the world from great factories of the United States and Canada.

An automobile manufactured in the United States or Canada may be marked for use in Madagascar or Manchuria and the product of a company in France may ultimately begin its operating career in Algeria or Tahiti, so the problem of supplying motor vehicles to countries which do not possess a manufacturing industry has become an increasingly important part of the world's automotive industry.

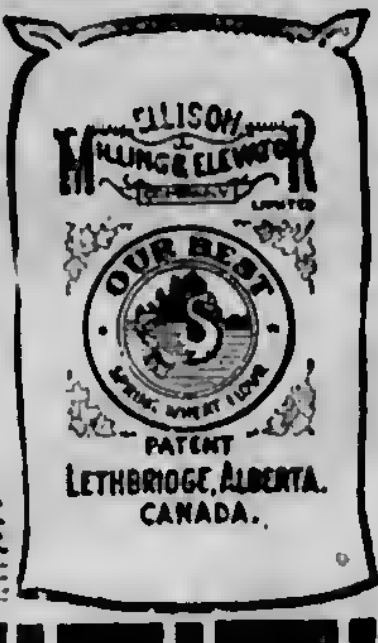

In 1929, exports of complete units from automobile manufacturing concerns throughout the world increased to 765,779, or 12.1 per cent of production as compared with 708,349, or 13.6 per cent of production, in 1928. Foreign shipments from the three principal exporting centers, the United States and Canada, the United Kingdom and France, increased from 663,438 vehicles in 1928 to 730,020 in 1929.

**Frigidaire**

is sold with a definite guarantee backed by General Motors AND still more important to you as a purchaser is the fact that year after year Frigidaire continues to give satisfaction—long after the guarantee has expired. If service should be required it is rendered instantly and without removing the machine from the premises. This is one reason why three times as many Frigidaires are now in use as any other make of electric refrigerator.

**DID YOU EVER STOP TO THINK**

(By Edson R. Waite)

THAT people everywhere are paying more attention to their buying. They are being educated in intelligent buying through the advertising columns of the newspapers.

It is a well known fact that advertisements give dependable information about dependable merchandise or service.

Experience has proven that persisting advertisers render the greatest possible service to their customer.

Most people realize that value is determined by what they get—not what they pay.

Well advertised lines are the kind that give full value.

Continuous advertising drives home the fact that everything in the advertisements is just as represented.

BUSINESS CONCERNS THAT ARE LEADERS ARE THE ONES WHO THINK ENOUGH OF THEIR CUSTOMERS TO SERVE THEM BY ADVERTISING, NOT ONCE IN A WHILE BUT ALL THE WHILE.

**WORLD ABSORBED 6,295,000 CARS IN SINGLE YEAR**

Ottawa, June 11: (Special to the Recorder)—From the assembly chains of the great motor factories and the workshops of smaller plants throughout the world rolled a vast tide of more than six and a quarter million of new passenger cars, trucks and buses in 1929. Reports of operation of great factories in the United States, Canada and Europe, where a year's output measured in thousands of vehicles as well as in smaller plants where production is counted in hundreds or scores of units, indicate that a total of 6,295,352 automobiles were manufactured during the year. That figure represented an increase of 1,092,231 vehicles in 1928.

Out of more than 270 motor factories in 16 different countries rolled this long line of new and more efficient units of transport to facilitate

**Provincial General Election**

Thursday, June 19th, 1930

**NOTICE TO VOTERS****The Voter Must Not:**

- USE THE X MARK.
- PLACE MORE THAN ONE CHOICE IN THE WHITE SPACE CONTAINING THE NAME OF ANY CANDIDATE.
- MAKE THE SAME CHOICE FOR MORE THAN ONE CANDIDATE.
- MAKE ANY MARK ON THE BALLOT NOT AUTHORIZED BY THESE DIRECTIONS.

**The Voter Shall:**

Go into the booth and, with the pencil provided, place the figure one (1) within the white space containing the name of the candidate who is his first choice. He may place the figure two (2) within the white space containing the name of the candidate he would prefer if the candidate who is his first choice cannot be elected with it. He may then place the figure three (3) within the white space containing the name of the candidate he would prefer if neither his first choice nor his second choice can be elected with it, and so on, marking as many choices as there are candidates.

The voter may plump for one candidate alone, using the figure one (1), without spoiling his ballot, but is urged to vote the full extent of his choices, as it is only by making the full number of choices that the voter obtains the full benefit of the ballot.

### CUTS

The small cut or scratch is not dangerous in itself, but it very often leads to a serious condition. The reason for this can be explained in a short phrase—neglect leads to infection.

The normal skin is a barrier which keeps out infection. When the barrier is broken, this affords an opportunity for the admission of germs which cause infection and to start the serious troubles for which these germs can be responsible.

The germs which cause infection are everywhere. By infection, we mean the inflammation, pain and swelling that generally progress to the formation of pus.

Years ago, very few operations were performed. This was not because the surgeons lacked skill, but because when they operated, the wounds became infected.

It was Lord Lister who made modern surgery possible by devising a practical means of keeping the germs

out of wounds, and thus removing the risk of infection from operations.

Wound infections do not occur in hospital today because of the methods used to keep germs out of wounds. Before a doctor cuts the skin, he prepares the surface in such a way as to destroy any germs present; he wears sterilized gloves for the operation, and uses only such instruments and accessories as have been sterilized.

To prevent trouble, the simplest cut or scratch should be promptly and properly treated. In this way, we can prevent the needless suffering and untimely deaths that often occur because of the neglect of something which appears too trivial to bother about.

There are certain rules we should follow, and one of these is never to put our fingers on a wound. Some persons always want to stick their fingers into everything, and by so doing, they are apt to cause a considerable amount of trouble. The hands, unless very thoroughly scrubbed, are almost sure to carry infection and, therefore, they should be kept away from cuts.

The treatment of wounds which are at all serious should be left to the doctor. When the skin is broken, it should be thoroughly cleansed, and for this, we should rely chiefly upon scrubbing with soap and water. The surface should then be covered with a sterile dressing which is changed when soiled.

Swelling or pain is the first symptom of infection, and if these occur, there should be no delay in calling the doctor.

Neglect leads to infection; prompt care prevents it.

### News Notes

The Raymond 2nd and Magrath 2nd Ward's "M" Men played a League game of Baseball here on Saturday evening, the Raymond boys winning by a score of 6-4. Sounds good, eh?

Prince Carol of Rumania, who has returned to his native land after five years banishment is now in line to be made king. A complete reconciliation between him and other members of the Royal family is reported.

### CANADIAN GEOGRAPHIC MAGAZINE

R. M. Linton, representing the Canadian Geographical Society was in Raymond last week booking subscribers for this new periodical.

The idea behind this Society is to make Canadians better acquainted with Canada and articles will be featured to this end, with of course leading geographical and other finds of modern science.

The magazine is well printed, color work being found in every issue, and is a periodical to be welcomed and thoroughly read in every home.

Mr. Linton's Lethbridge address is 832-7th St. South, Lethbridge, if you wish to send in a subscription.

## 500 MILE INDIANAPOLIS SPEEDWAY RACE

### FLASH

Indianapolis, May 30, 1930: Billy Arnold, driving at an average speed of 100.118 miles per hour, won the 500-mile Speedway race here today on Firestone Gum-Dipped Tires.

BECAUSE of their extra strength and stamina, Firestone Gum-Dipped Tires hold all world's records for mileage and endurance.

Gum-Dipping is an exclusive Firestone process and the only known method of completely insulating every fibre of the tire against internal friction—the greatest enemy to tire life.

This extra process, combined with a rugged safety tread, produces the greatest strength, stamina and safety that is possible to build into a tire.
